

TARIQUE SHAIKH

SOFTWARE ENGINEER

+91-9920488434

tariquescript@gmail.com

linkedin.com/in/tariquedev

github.com/tariquescript

tariquescript.vercel.app

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Tailwind CSS

Tools: Git, GitHub, Cloudflare, Postman, Ubuntu

Databases: MongoDB, MySQL

AI & Dev Tooling: AI-Assisted Development, MCP (Model Context Protocol), Cursor, Antigravity, VS Code

Concepts: REST APIs, JWT Auth, CRUD, API Integration, System Design

EDUCATION

B.E. Computer Science

RKDF University
Graduated 2024

Diploma in Computer Science

M.H. Saboo Siddik Polytechnic
Graduated 2019

CERTIFICATIONS

- Hackathon ERR_404 — Top 10% (2021)
- MySQL Certification (2023)
- C Programming (2022)
- Python with Data Science (2019)
- Cybersecurity & Ethical Hacking – National Workshop (2018)

PROFILE

Full-stack Software Engineer who took a startup's flagship product from zero to production as its founding engineer, owning architecture, deployment, and infrastructure end-to-end. Comfortable operating across the stack (React, Node.js, MongoDB/MySQL) and increasingly focused on AI-assisted development workflows — using tools like Cursor and Antigravity with MCP-based connectors to ship faster without compromising code quality.

EXPERIENCE

FE Global Education — Study Abroad Counselling

Founding Software Engineer

Nov 2024 – Present

Websites: feglobaleducation.com | greenrevolutionservices.com

- Architected and built the company's primary web platform (React, Node.js, Tailwind CSS, Cloudflare) for student inquiries and lead capture, and independently built, deployed, and maintain a second production website end-to-end — managing hosting, DNS, and security through Cloudflare
- Designed and built a custom CRM system to manage agent and college relationships, and continue to maintain and extend it as operational needs evolve
- As a founding team member, worked directly alongside student acquisition and counselling operations, aligning engineering priorities with growth goals
- Adopted AI-assisted development practices (Cursor, Antigravity, MCP tool/connector integrations) to speed up iteration cycles across both products

PROJECTS

F Player Profile | f-player-profile.vercel.app | React.js, Tailwind CSS, REST API

- Consumed external REST APIs for real-time player stats and profiles
- Built a fully responsive UI with React.js and Tailwind CSS

Celeb Details | celeb-detials.vercel.app | React.js, Tailwind CSS, External API

- Integrated a celebrity data API for search, biography, and media content
- Implemented dynamic, real-time search with a clean, responsive interface

Sportsweed | sportsweed.netlify.app | React.js, Tailwind CSS, Live Data

- Integrated live match data feeds for real-time sports updates
- Built a responsive sports dashboard with Tailwind CSS

Sumaiya Engineering | sumaiyaengineering.vercel.app | HTML, CSS, JavaScript

- Freelance client project — owned requirements gathering, design, and deployment independently
- Delivered a polished, professional visual layout for the client's brand

E-Commerce Platform | ecommerce-ts-react.vercel.app | React, TypeScript, Tailwind CSS

- Built product listing, cart, and checkout flows with type-safe React components
- Structured the codebase in TypeScript for a scalable, maintainable full-stack architecture
